

Soothing Your Dog's Achy and Stiff Joints

Helping dogs that are living with arthritis and joint pain.

As your dog ages, you are likely to see changes in his or her behavior as nature takes its toll. Since dogs can't use language to express how they feel, you might not realize that your dog is experiencing discomfort or pain. Signs to look for are stiff legs, a reluctance to stand up and decreased activity. Another symptom to look out for is mood change. A dog who is usually happy, suddenly becomes grumpy or nippy, is usually showing signs of pain or discomfort. The weather can impact these pains; your dog may suffer more on cold or damp days.

If you have concerns, you should get a proper diagnosis from a veterinarian. Work with your vet to create a plan of action. This article is simply a guide for soothing achy and stiff joints in your beloved dog.

Soothing is a Lifestyle

Your best bet is to integrate pain relief and comfort techniques in to the full lifestyle of the pet. While that might sound difficult, it really isn't. There are lots of options available to make soothing your pet's aching limbs easy.

Start by taking a look at the dog's weight. Excessive pounds are hard on the body in many ways, joints included! If your dog is overweight, restrict his/her diet and get that exercise in!

Exercise

Exercise is important for mobility in general. Choose activities that are appropriate for your dog's age and ability. For example, if he/she has a lot of pain, walk on the grass, dirt or wood chips for added cushioning versus hard cement or blacktop. Swimming is another great exercise for dogs with joint issues as it causes little to no impact on joints.

Beneficial Nutrients

- **Glucosamine** is for improving joint lubricant production and cartilage health.
- **Chondroitin** is known for aiding the repair of connective tissue. It may also inhibit destructive enzymes, which helps the body repair cartilage and bone.
- **Omega 3-fatty acids** are anti-inflammatory and reduce pain.
- **Vitamin E** is an antioxidant that can prevent cellular damage caused by free radicals, keeps elasticity in muscles and reducing inflammation in joints.
- **Selenium** is an antioxidant that slows down cellular aging, preserves tissue elasticity and helps maintain healthy membrane tissues. Selenium also combats inflammation.
- **MSM** (Methyl-sulfonyl-methane) is a naturally occurring sulfur compound produced by ocean plankton that is an anti-inflammatory and relieves pain resulting from arthritis and joint problems.
- **Tart Cherry** is known to be an anti-inflammatory and analgesic that helps with pain associated with arthritis, physical over-use, and neuropathic pain.
- **Green-Lipped Mussel** is an extract from a New Zealand mussel. Mussels are rich in Omega-3 fatty acids. Anti-inflammatory benefits have been found in osteoarthritis studies when green-lipped mussels were added to traditional therapies.
- **Sallaki** (*Boswellia serrata*) is a widely recommended anti-inflammatory herb. The boswellia plant produces Indian frankincense.
- **Ashwagandha** is an herb that is known to significantly reduce stiffness and pain while improving movement.

Additional Natural Anti-inflammatories

- **Fruits:** Dried plums, grapefruits, grapes, blueberries, pomegranates, mangos, bananas, peaches, apples.
- **Spices:** Ginger, turmeric.
- **Oils:** Olive Oil, fish oil, borage seed oil

Think comfort!

Cushy, soft and warm will feel much better for your dog than cold, hard, damp or drafty. A pet bed provides a cozy retreat for tired joints. Look for a supportive foam that won't cause any pressure points, like Precision Pet's® SnooZZy® Orthopedic Foam Pillow Mattress. This pet bed is made up of 70% memory foam and 30% regular foam for firm support. The low profile rectangular shape is easy for your tired dog to get on and off of the bed.

Adding a heat source to your pet's bed is a nice way to provide joint soothing warmth. K&H® Creative Solutions Ortho-Heat bed combines two inches of orthopedic foam, a woolly microfleece cover and a dual-heated pad so you can choose the best temperature for your pet. The microfleece cover is removable and machine washable. This waterproof bed can be used indoors or outdoors in a covered area – a dog house, for instance.

The Comfy Pet Cot from K&H eliminates pressure points, giving a soothing place to rest. The elevated pillow top sleeping area is the perfect height to keep pets off cold or hot floors. K&H is available with different covers that offer non-electric temperature control. There is a Self-Warming Pet Cot and Cover as well as a Coolin' Pet Cot & Cover. If you share your furniture with your dog, consider a portable ramp to help him/her to get up on to the bed or couch. A ramp is also helpful for automobiles.

Slippery floors can be hard on delicate joints. Protect your dog from slip and falls by keeping slick floors covered with a rug.

Nutrition

Nutrition plays an important role in pain relief and joint health. A diet of quality feed fortified with nutrients that support joint health combined with nutritional supplements will bring the best results. Look for dog food that contains a combination of glucosamine, chondroitin sulfate, omega-3 fatty acids, and vitamin E. Supplementing with any of these nutrients, MSM or herbal support is even more beneficial.

Supplements

Provide your achy four-footed friend additional nutrient support through supplements along with quality food. Choose animal specific supplements, rather than ones made for humans. Supplements formulated for dogs ensure effectiveness and safety. A number of trustworthy brands are available at local pet specialty stores. Look for NaturVet, Overby Farms, NutriVet and Sentry.

PCR Oil / Hemp Oil

PCR Oil is a non-psychoactive compound that is found in hemp plants. While still controversial, advocates believe PCR has a number of health benefits, including being an effective anti-inflammatory. The Journal of Experimental Medicine published a study that shows PCR significantly reduced chronic inflammation and pain in some mice and rats. There are products showing up on the pet specialty market that contain hemp oil. As with any medicinal supplement, proper dosage should be followed. Talk to your vet about the benefits and risks of herbal hemp products for your pet.

Quality Supplements for Dogs that Improve Joint Support

K-9 Herbal + is a holistic, antioxidant dog biscuit made with real pumpkin and PCR oil that can help with inflammatory pain, as well as anxiety, allergies, digestive issues, bad breath, immune support, and cancer cell growth. There is no psychoactive affect because the biscuits contain no THC. K-9 Herbal is formulated, sourced and manufactured in the USA.

Glucosamine Treats

Best results from glucosamine are seen with proper dosage, which is based on weight. Achieving enough of the proper amount is difficult from food alone. You should seek advice from a vet about how much glucosamine is right for your dog, but here are some guidelines:

- Under 25 lbs – 500 mg
- 25-50lb – 1000mg
- over 50lbs – 1500 mg

Treats are a nice way to enhance the amount of glucosamine your dog ingests. Isle of Dogs, NPIC and Greenies offer quality choices in glucosamine treats for dogs.

Pain Relievers

If your dog is in great pain, NSAIDs (nonsteroidal anti-inflammatory drugs) can be helpful. Aspirin is available over the counter for dogs. Aspirin provides temporary relief of pain and inflammation caused by arthritis and joint problems. Never give your pet medications formulated for humans. Species specific over the counter drugs are formulated properly for the safety of your pet. Choose medications that are appropriately dosed for the size of your dog. If a greater amount of pain relief is needed, other dog specific NSAIDs are available with a prescription from a veterinarian.

NaturVet has a chewable Aspirin tablet that comes in two different formulations. Choose either Small Breed or Medium & Large Breed.

NutriVet offers Aspirin for dogs in a liver flavor chewable tablet. Choose the right label for your pet, either Small Dog or Large Dog.

As a pet lover, the last thing you want to see is your beloved dog suffering. If achy or stiff joints are ailing your fur baby, incorporate joint support as full lifestyle. Comfort, warmth, exercise and joint support nutrients together provide relief that will keep your dog happy and feeling good. 

Soothing Your Dog's Achy and Stiff Joints
